

DEVELOPING AND STRENGTHENING NATURE IN THE CITY

In this period of containment, the South-Provence-Alpes-Côte d'Azur Region reopens its MOOC Nature for City LIFE on nature in the city and adaptation to climate change, initial session.

You were not able to follow it during the first sessions?
You were registered for the first sessions but couldn't follow him all the way through?
Do you want to refresh your knowledge?

Log in today until May 4th.

To (re)discover nature in the city from every angle in the face of climate change!

This MOOC in four themes allows you to acquire skills on :

- knowledge of the different forms of nature in cities, how they function and the associated ecosystem services;
- the state of the art, techniques for integrating and managing nature in urban projects for better resilience to climate change;
- the understanding of urban strategies for climate change resilience.

During the confinement period all videos and quizzes will be accessible! (for reasons of unavailability, the forums will not be open).

We are therefore expecting many of you for this confined catch-up session! If you haven't already done so, sign up quickly via the link below, and find the MOOC videos and quizzes today!

This initial MOOC Nature for City LIFE course will be deepened by an advanced course that you can follow from June 2020.

Go to the following link to get started: <https://moochnatureforcitylife.eu/>

Good MOOC!
